24 Technical Specs

BLUE ICE THERMAL

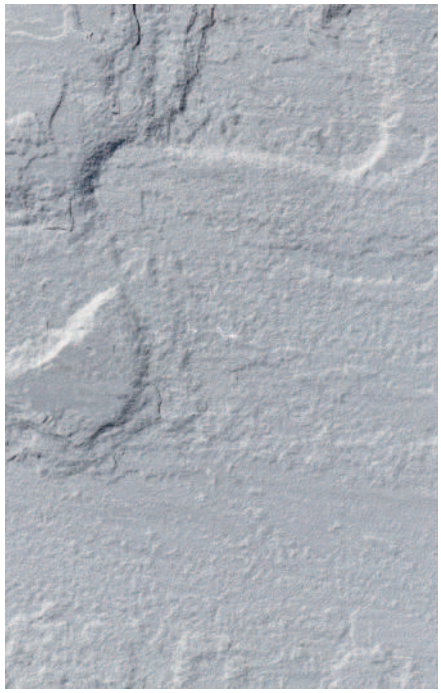

Blue Ice is fantastic for patios, walkways, and pool decks. It has an elegant look at an affordable price.

BLUE ICE NATURAL

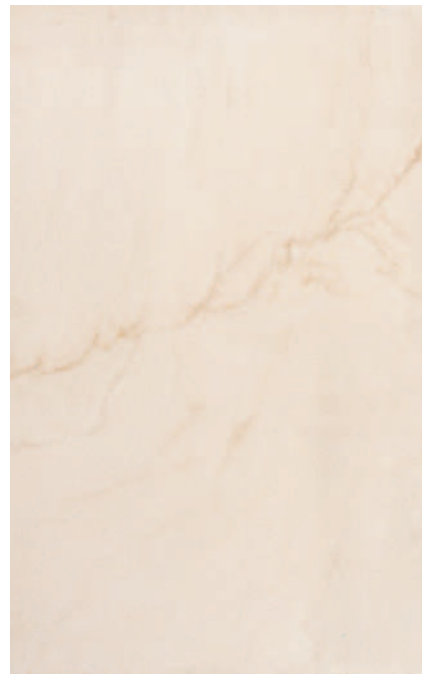

Relax with Blue Ice. The natural finish is slip-resistant, due to the inherent qualities of the stone.

Oxford Buff features a distinctive blend of tan and cream colors, blending with incredible movement.

AUTUMN BROWN THERMAL

With a clean thermal finish and warm color palette, this stone will welcome your guests for years to come.

AUTUMN BROWN NATURAL

Autumn Brown Sandstone features a natural cleft surface, each piece having a unique natural surface texture.

ITALIAN BLUESTONE

Versatility, workability, and durability are some of the reasons to love this natural stone from Italy.

PREMIUM DARK BLUESTONE

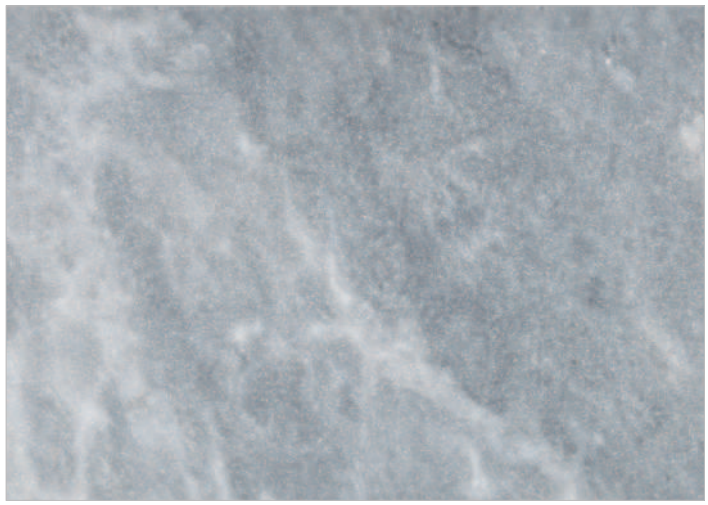

Our Premium Dark Bluestone creates a clean and bold aesthetic to any project.

MISTY BLUE & ARCTIC CLOUD

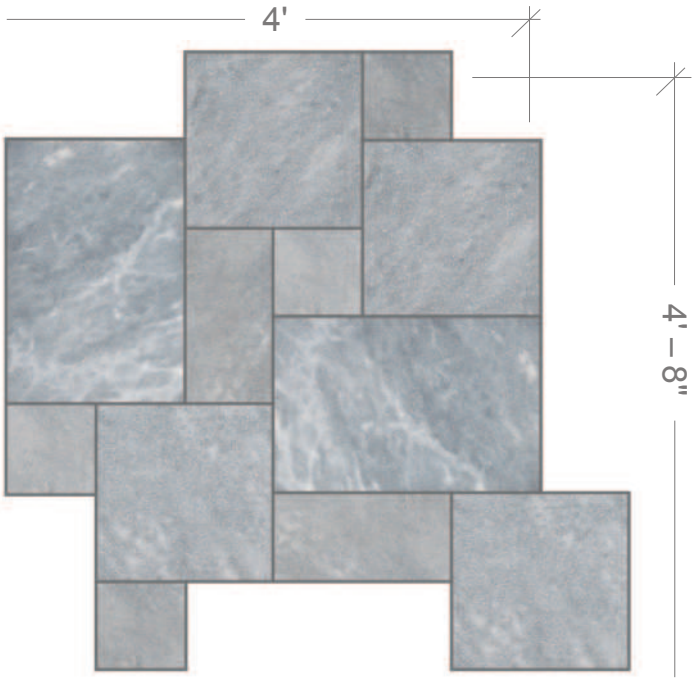

Misty Blue

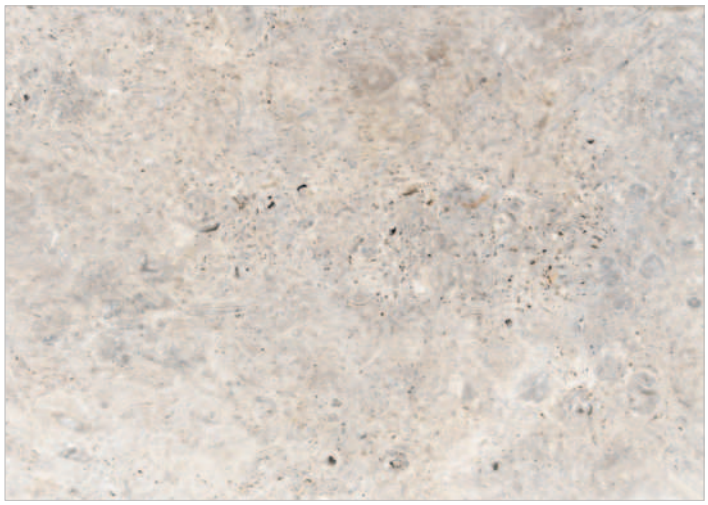

Arctic Cloud

Our luxurious French pattern design is the epitome of elegance and style. With four different sizes seamlessly interlocking, these pavers create a stunning mosaic that will transform any outdoor hardscape into a work of art. Give your space a unique finish and make a bold statement with our distinctive marble pavers.

SILVER & WALNUT

Silver

Walnut

SILVER RIDGE

Silver Ridge Granite is dense, and remains cooler than darker granites and sandstones.

Sandy Point Granite features warm color tones with incredible highlights and movement.

BLUE MIST

Blue Mist Granite installed in a running bond pattern, complimented by steps in a matching material.

IMPORTED GRAY

Imported Gray Granite offers an economical choice for applications specifying a neutral gray color.

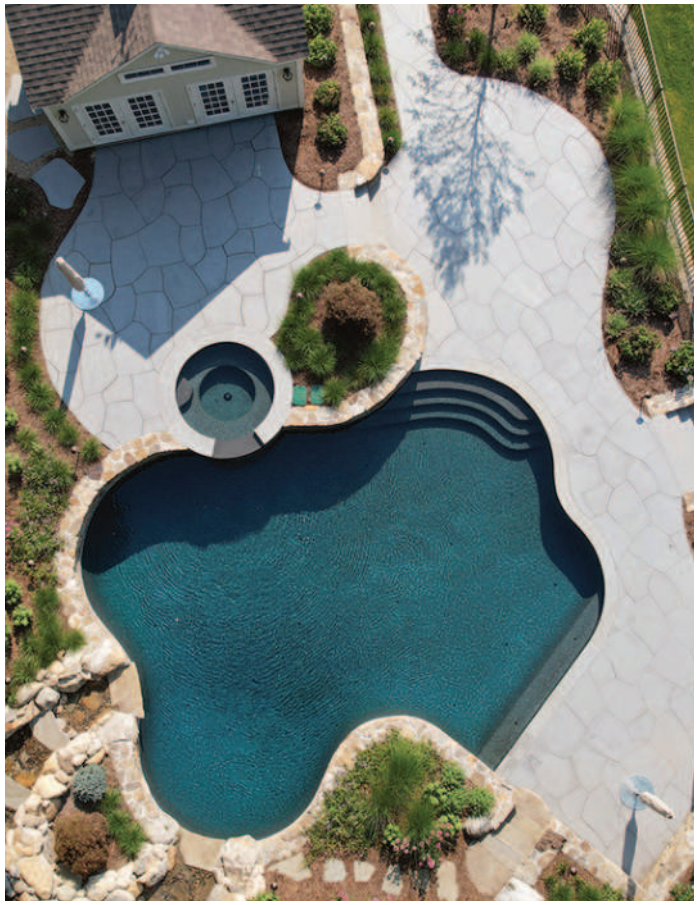

Phoenician Granite is a very dense beige stone with flecks of gray and slight rose color spread throughout the stone.

IRREGULAR PATTERN

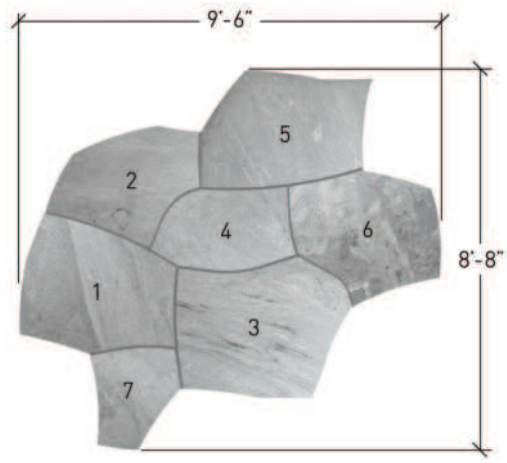

Each pattern set consists of 7 numbered pieces that cover 50 SF. Each piece is cut from solid granite forming the repeating pattern, using ultra-durable 1.5” thick stone. Our large format irregular patterned flagging creates high-end spaces in a fraction of the time. Irregular flagging utilizes natural cut stone for a remarkable organic look for any design and project. When flagstone features an irregular cut, the stone’s angles will be unique, creating a much more naturalistic and organic appearance.

GARDEN PATH STEPPERS

4 different shapes in a pallet

Natural cleft tumbled stepping stones create a simple and affordable pathway that adds charm to any outdoor space. These garden path steppers are perfect for elevating walking paths through grass, gardens, or even walkways leading to entrances of your home or shed.
