REAL PEOPLE. REAL IMPACT. REAL STONE.

MANUFACTURED SUSTAINABLY AND RESPONSIBLY.

Our factory is powered by a revolutionary in-roof solar system—covering 35,000 square feet and cutting over 500 tonnes of CO2 annually. That's like planting 8,000 trees every single year! We've also mastered the art of reusing water, wood, and stone rubble like eco-ninjas. Because sustainability isn't just a buzzword—it's how we roll.

WE SEND IT TO YOU WITH LESS WASTE AND MORE YIELD.

We CUT, TOOL, TRIM and FIT™ each stone, ensuring that every layer is ready for a perfect fit, has the correct quantity and the best color and size variations so your stone is delivered Installation Ready™. You can take it right **FROM THE CRATE TO THE WALL.**

THEN WE HELP MAKE IT STICK.

We've added grooves on the back of our stone to make your job easier. Our proprietary GripSet® Technology creates a non-slip surface allowing mortar to penetrate the stone, creating a stronger surface bond with the surface.

AND THAT'S GROOVY.

DREAM IT, SEE IT, STONE IT.

Stop guessing and start dreaming with our Project Visualizer! Upload a photo of your home or building and play around with stone profiles and colors until you find "the one." It's easy, fun, and the perfect way to picture the possibilities before you make it real.
